

TERMOSIGN - application

TERMOSIGN is:

- preformed thermoplastic pavement markings, that are used for horizontal high build marking of roads, streets, squares and parkings
- easy and fast application not requires special tools and skilled workers
- high resistant against erasure and impurity material
- good adhesion makes it possible to use on the all types of roads
- high property of reflecting light provide good visibility in case of precipitation
- possibility of fast road traffic adjustment

MARKING OF DEDICATED TRAFFIC LINES

Right line ends with turn to a gas station. There is a need to early inform drivers about the dedicated traffic line.

There was used horizontal „Petrol station” mark serie.

Dedicated traffic line with a right turn to the hospital for the ambulance. Horizontal marking informs about dedicated traffic line much earlier than vertical signs.

There were used horizontal „Ambulance” mark serie and yellow destination arrows.

Only public transport can move straight or turn left. Horizontal signs in a clear way delivers information about all possible movement directions

There were used bicolor arrows serie and a „BUS” mark.

Traffic line in the center of the city moves to a covered parking. In that case marks on the line make it easier to find it.

There was used „Covered parking” mark serie.

MARKING IN PARTICULARLY UNSAFE PLACES

At the ringroad entrance there is a need of clearly visible marking of necessary giving way to the transport moving on the ringroad.
There was used mark „Give way” at the every traffic line.

There is a need to early inform drivers about transport height allowed to move under an overpass.
There was used „No vehicle over 3,5 m height” sign serie.

Bicycle track with limited visibility requires high contrast mark, that will draw driver's attention.
There was used „Cyclists” mark serie.

Bicycle track with limited visibility also requires special mark for cyclists.
There were used an „Attention!” mark with an additional informative mark.

REDUCING MOVEMENT SPEED

New slow moving traffic line required simple and readable mark.
There were used „Limited speed zone” marks at the both sides of the traffic line.

DIFFICULT TRAFFIC ORGANIZATION

Due to lack of a sidewalk, there is allocated for pedestrians line on a road.
There were used „Pedestrians-only road” marks for each 50 meters of the line.
